

MILESIGHT PRO DOME NETWORK CAMERA

Milesight's newly-launched dome network camera is the most robust weather-proof and vandal-proof solution with motorized zoom lens, outshining all the others in hardware innovations for hassle-free installation and maintenance.

IP66

CLAMSHELL DESIGN

Aiming to reduce the installation troubles to the least, Milesight creatively introduces the clamshell design to the dome base. This revolutionary innovation enlarges the space to make cable connection a piece of cake, greatly saving efforts for installers.

INTEGRATED CABLE MANAGEMENT

In the base support, there is power interface, POE port, and other interfaces. Thanks to integrated cable management, it takes no effort in installation.

3RD GENERATION DOT MATRIX IR LEDS

New Camera

Old Camera

In order to provide superior night visibility, the Pro dome camera employs the 3rd generation dot matrix IR LEDs, essentially guaranteeing excellent image quality, long lifespan and energy efficiency.

3-AXIS MECHANICAL DESIGN

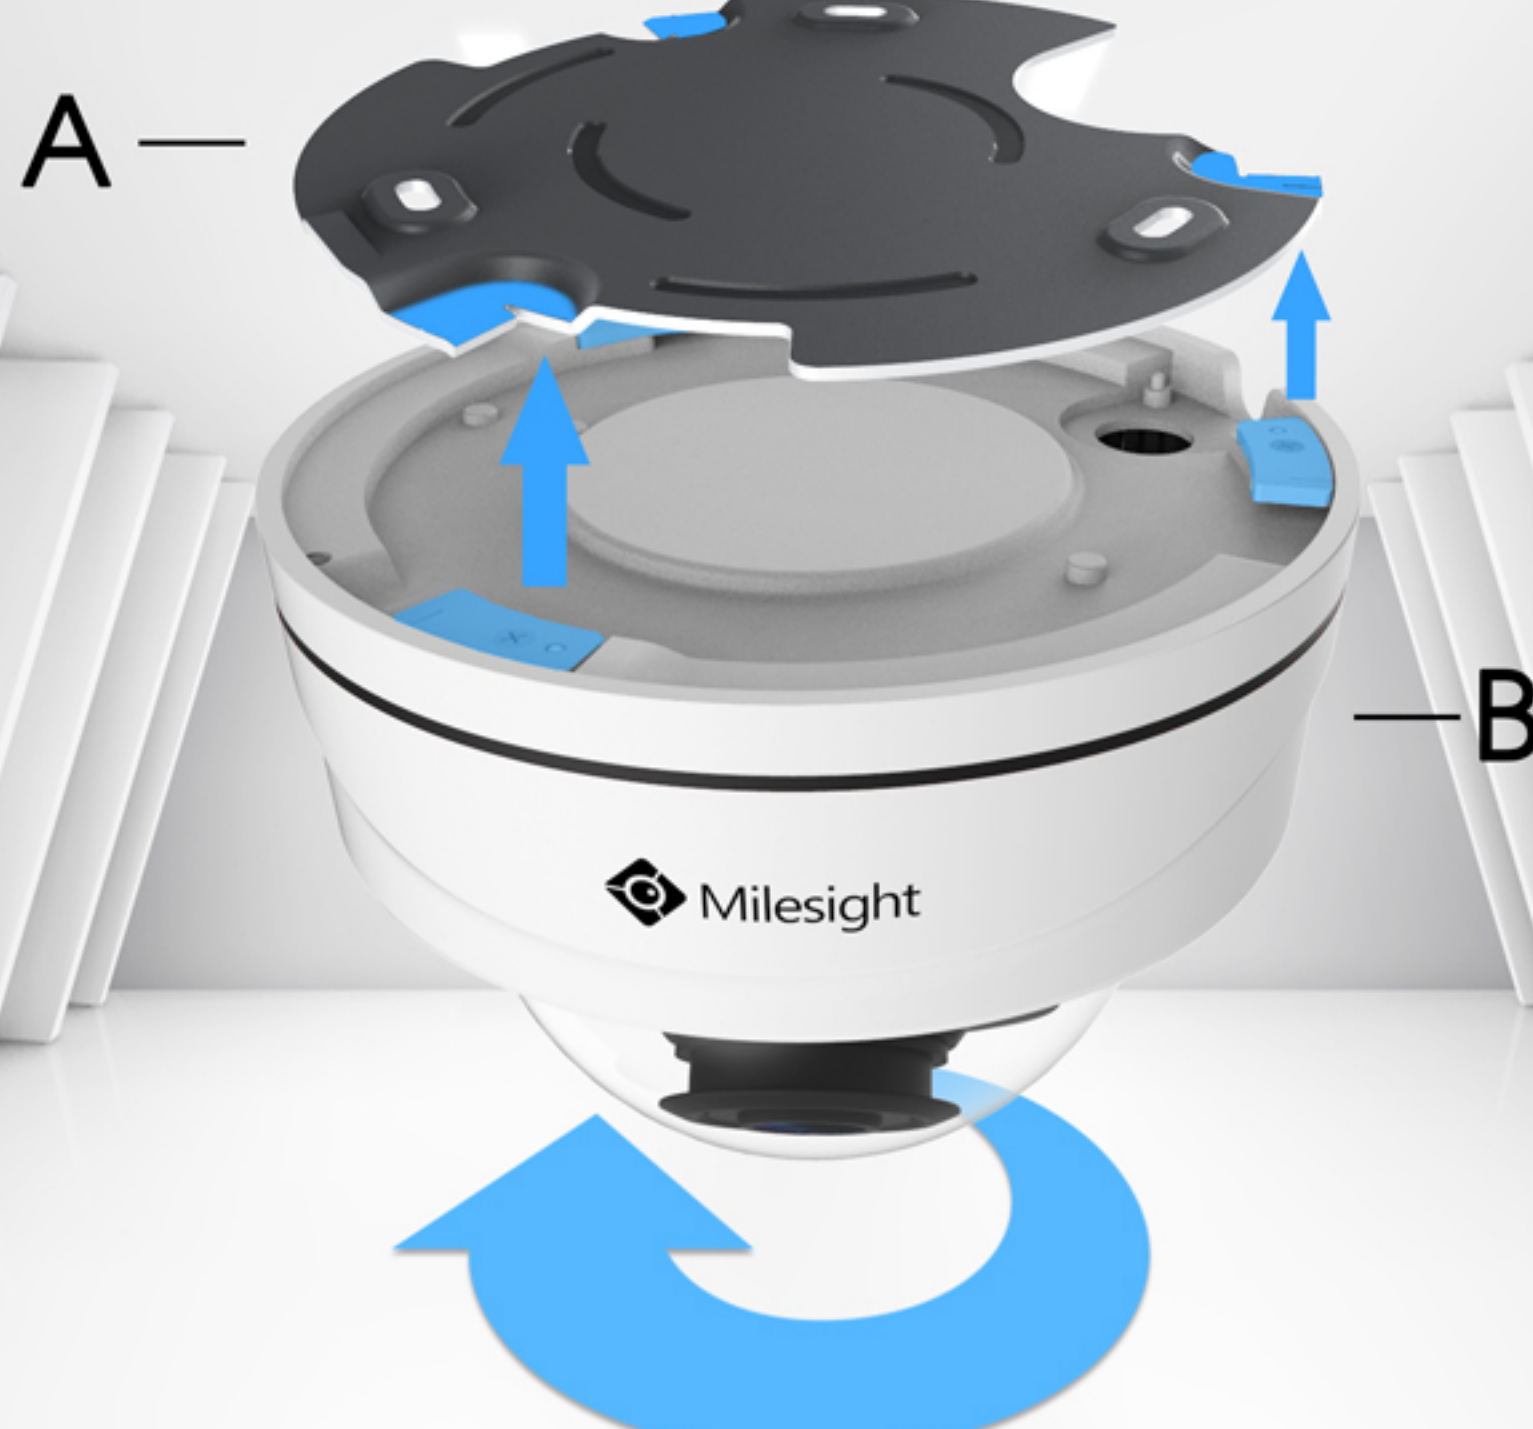

The new dome network camera features 3-axis mechanical design for fast and easy adjustment of the camera's viewing angle, allowing you to precisely position the camera.

P-IRIS CONTROL

Adopting P-Iris control technology, the Pro dome camera is able to optimize the iris opening under all lighting conditions, offering images with better contrast, clarity, resolution and depth of field.

MOUNTING BRACKET

For installers, holding the camera body to secure the screws into the wall is a fatiguesome job. Being customer-oriented, Milesight optimized the hardware structure to avoid that with a light thin mounting bracket. Installers could firstly secure the mounting bracket in the desired location and then insert the camera body, thus no unnecessary energy is wasted.
